ЧАСТЫЕ ВОПРОСЫ

Вопрос	Ответ
Я хочу покрасить корабль так же, как на фотографиях. Как это сделать?	1. Возьмите подходящую краску. Автор использовал смесь акрилового лака с пигментом. 2. Покройте весь корпус тёмно-зелёным цветом. 3. Окрасьте нужные детали золотой краской. 4. На нижнюю часть корпуса нанесите более мутный оттенок, имитируя следы воды. Используйте меньше пигмента и больше лака, чтобы наносить полупрозрачные слои, не перекрывая предыдущие. Между слоями можно добавить следы ракушек белой краской или маркером.
После вырезания деталей соединения получились слишком тугими (или слишком свободными).	Перед вырезанием подберите компенсацию реза для вашего лазера и примените её к слоям резки. Проверьте ширину реза на тестовых деталях из файла.

ВНИМАНИЕ

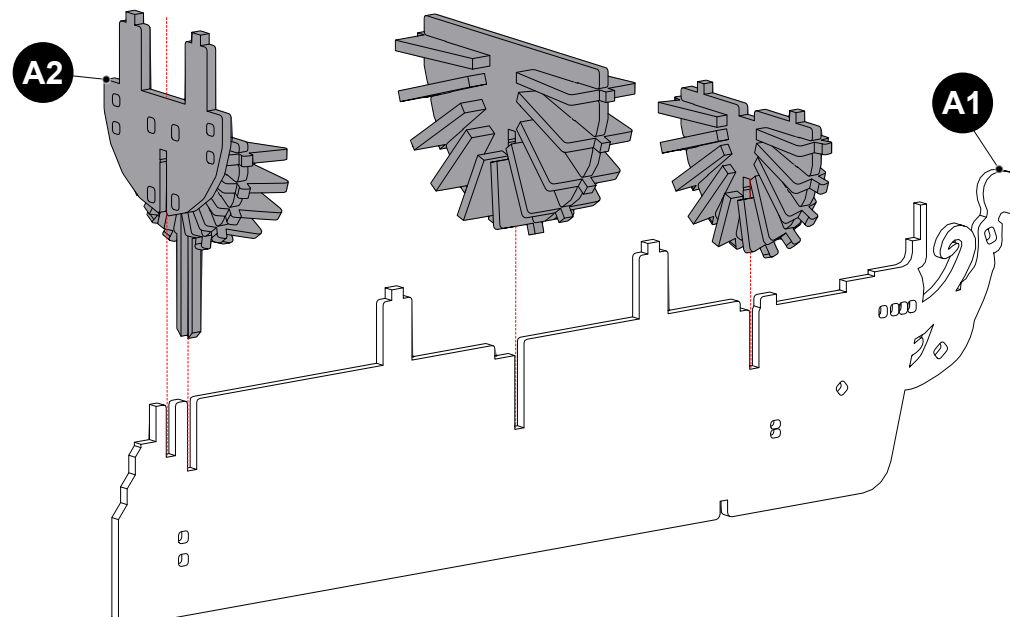

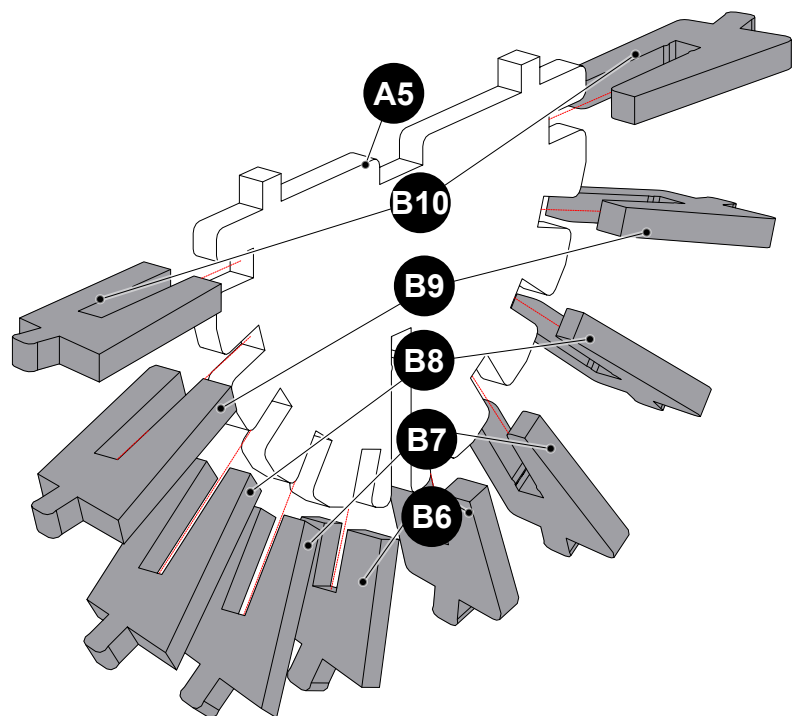

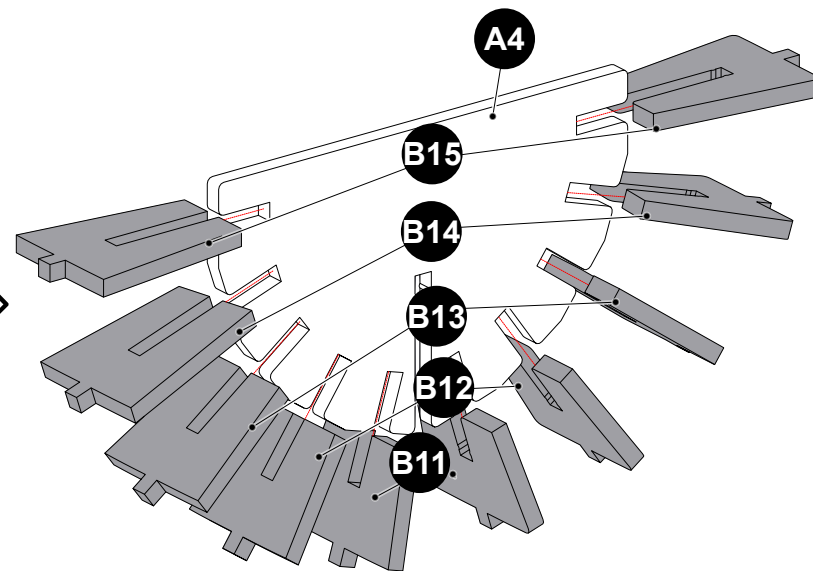

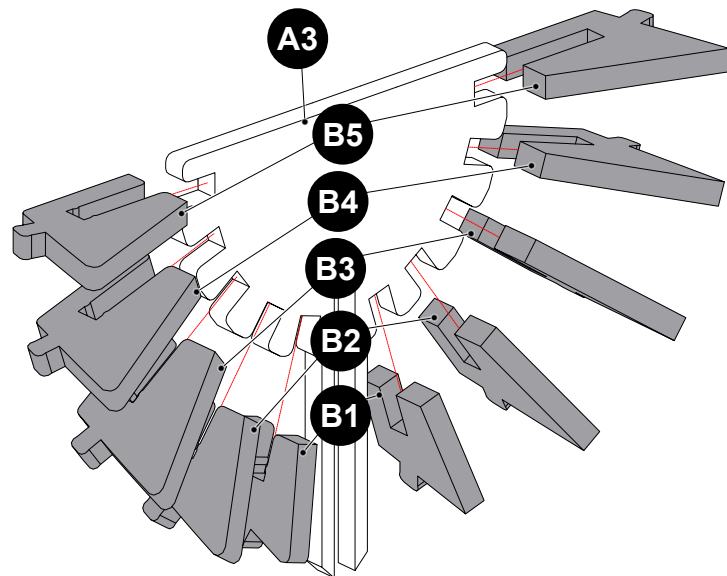

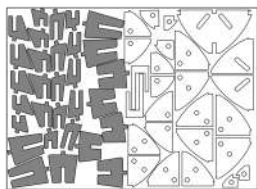

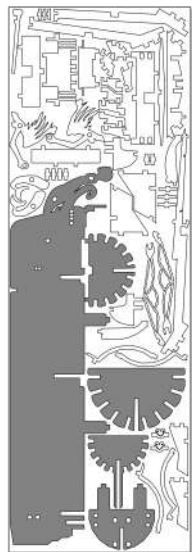

- Убедитесь, что номера деталей в инструкции совпадают с номерами на листах.
- Если детали соединяются слишком туго или подвижные части двигаются с трудом, обработайте соединения наждачной бумагой.
- При необходимости укрепите соединение клеем.

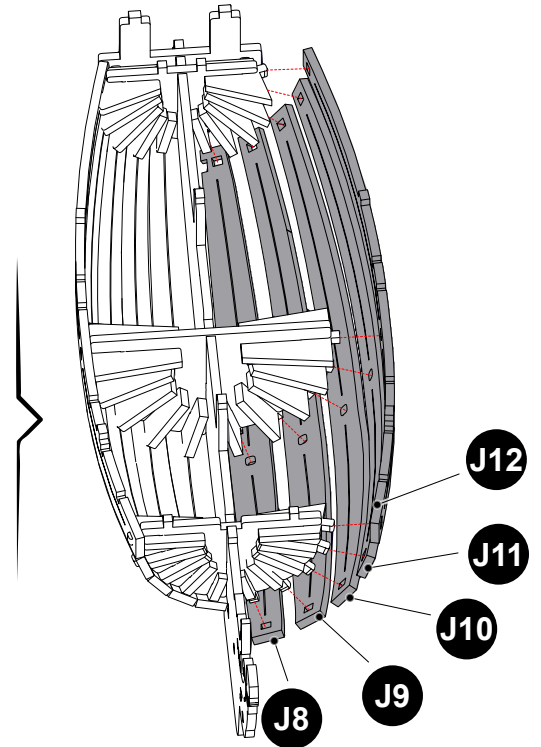

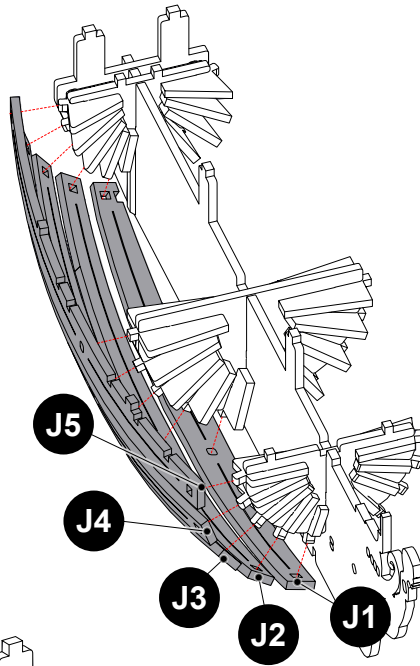

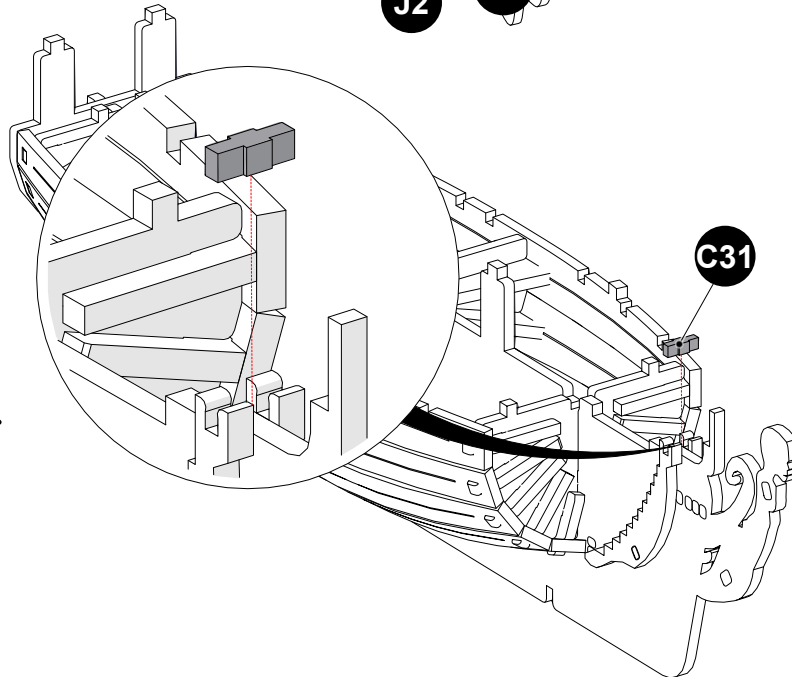

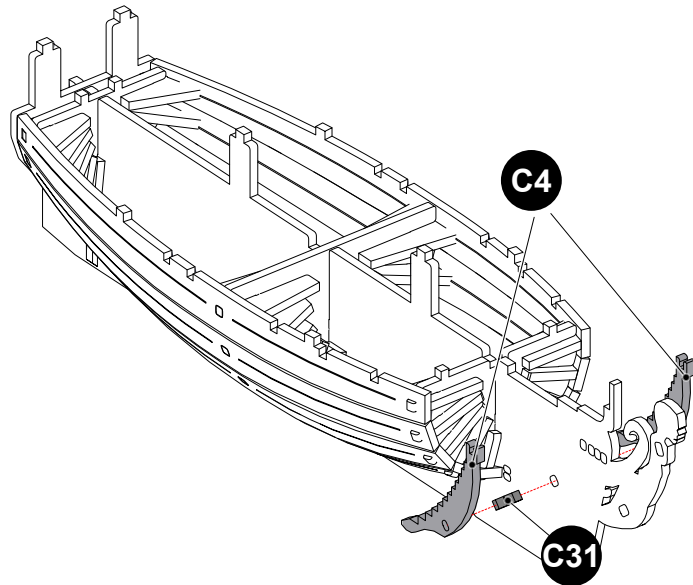

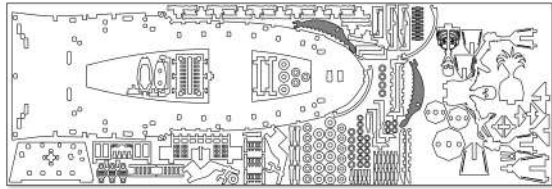

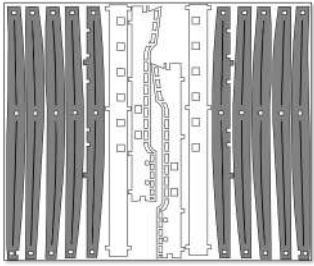

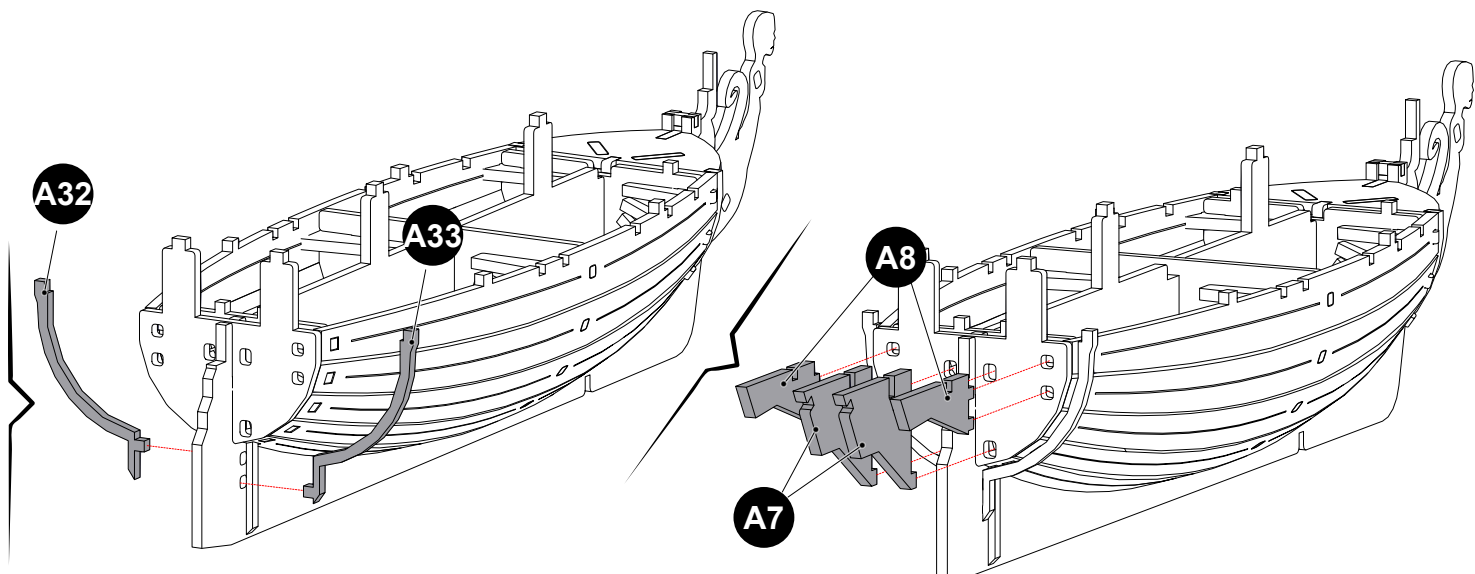

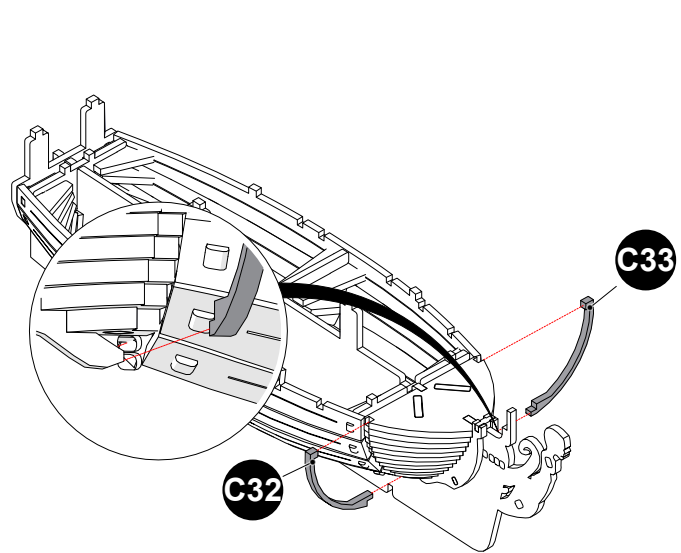

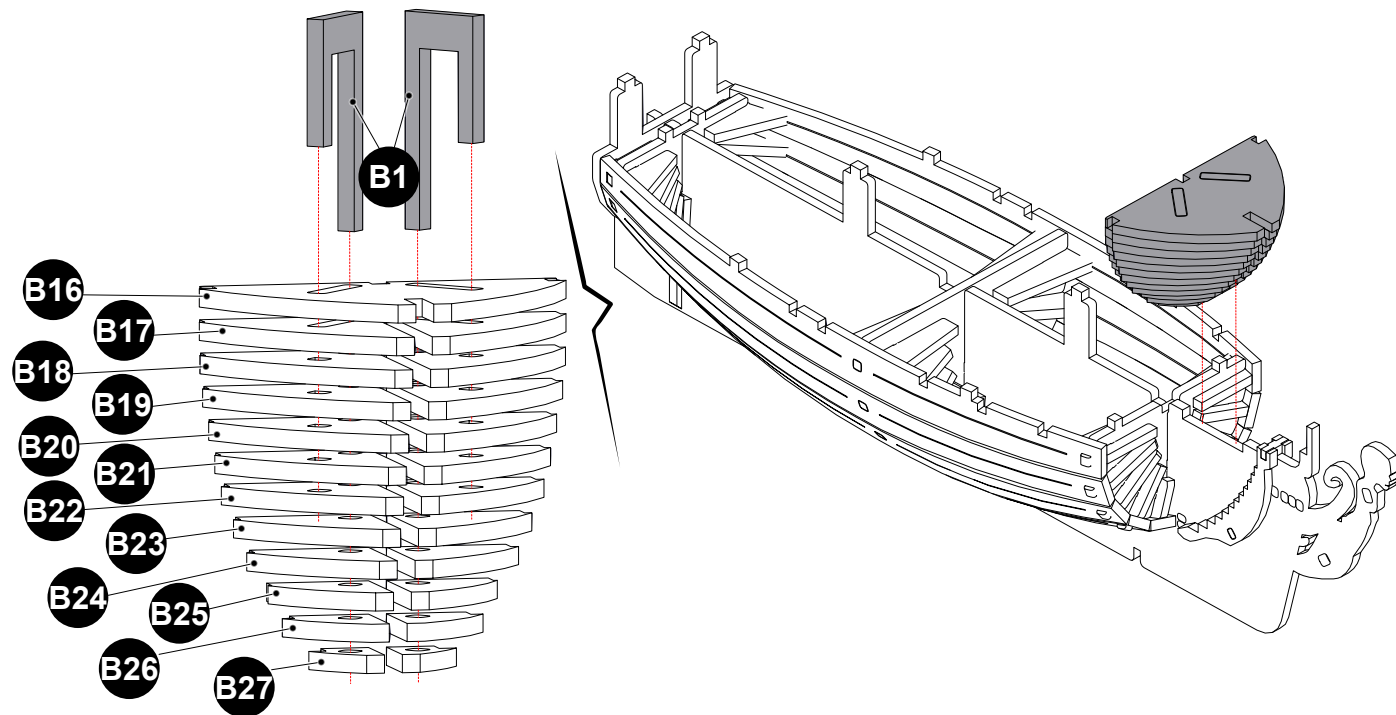

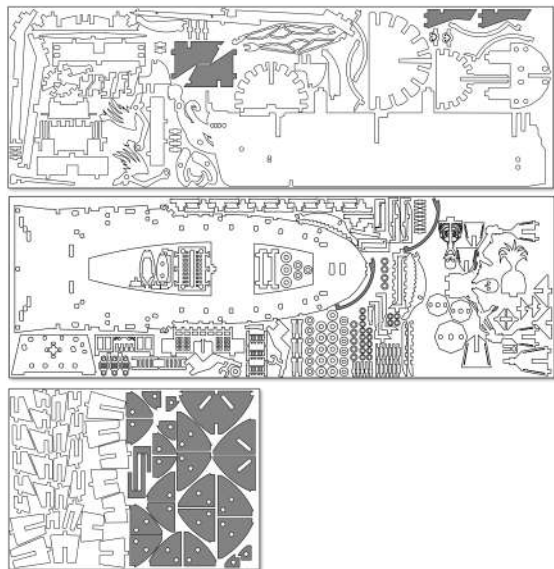

Собирайте по порядку

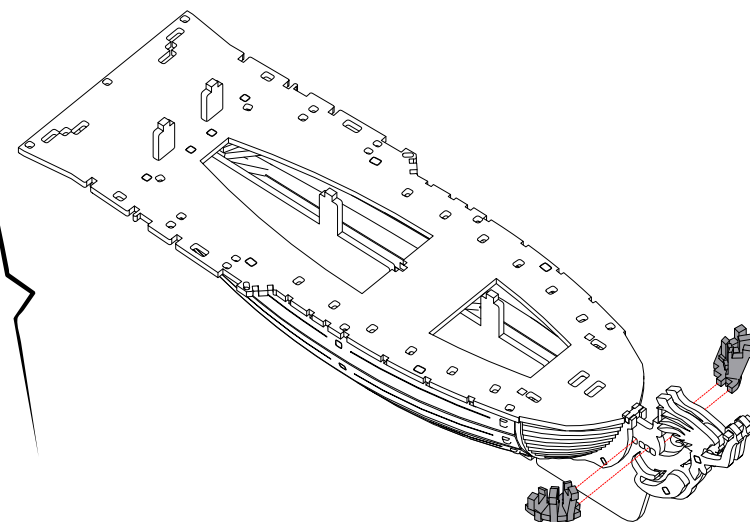

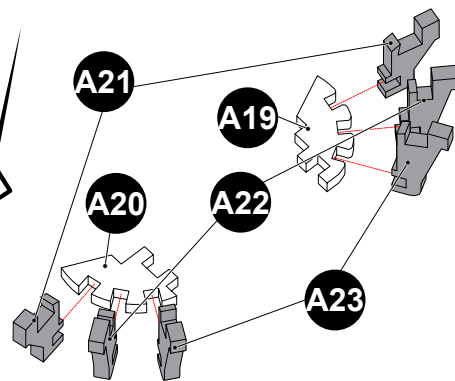

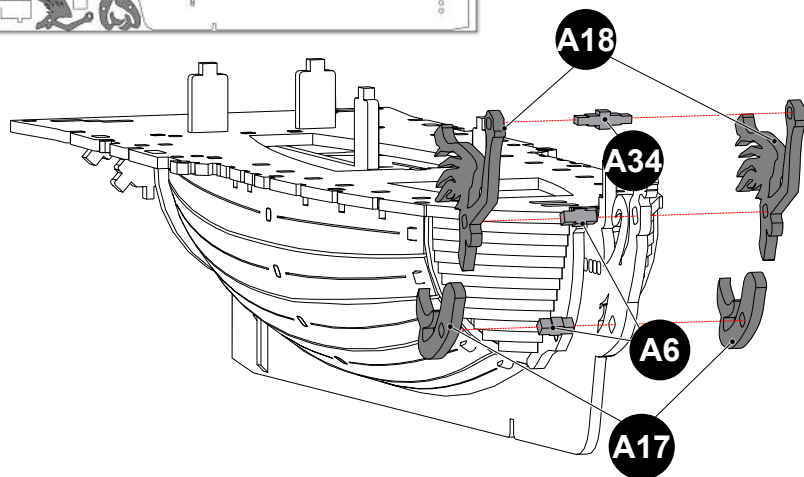

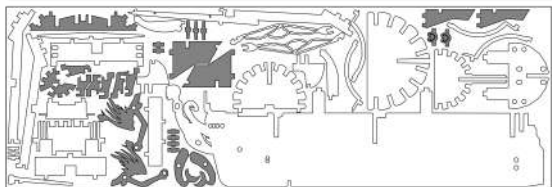

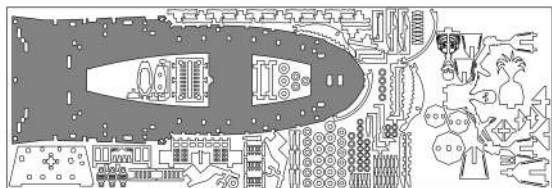

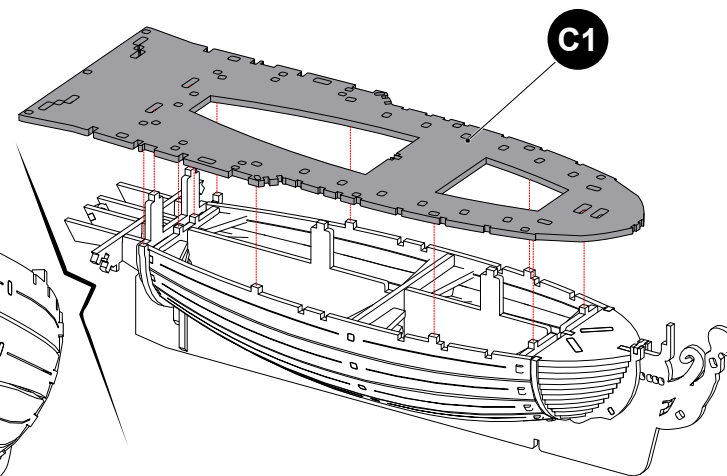

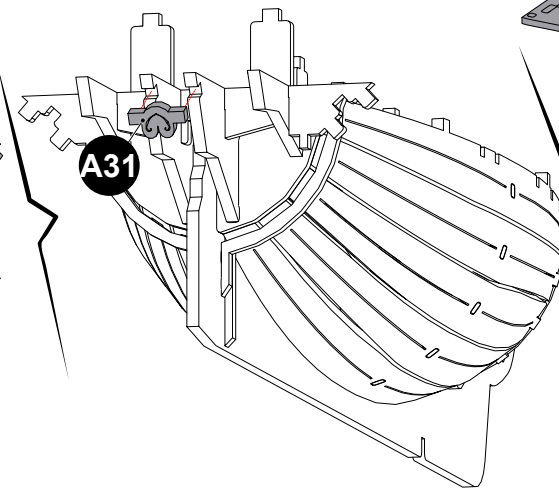

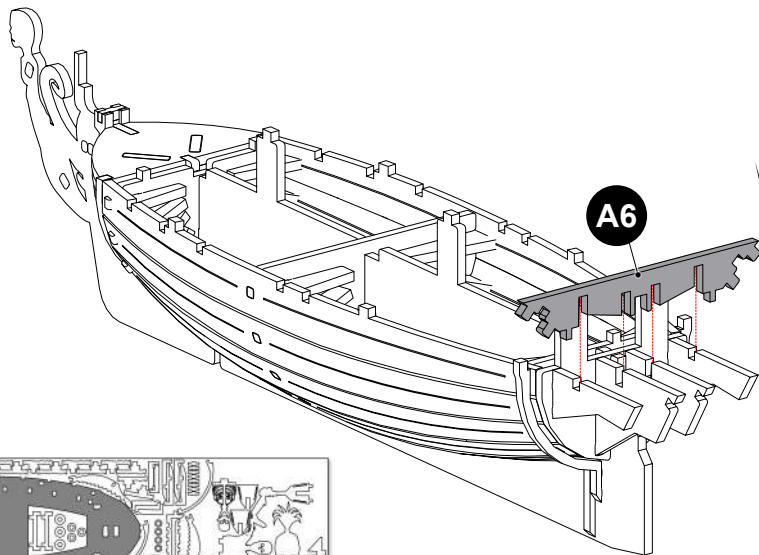

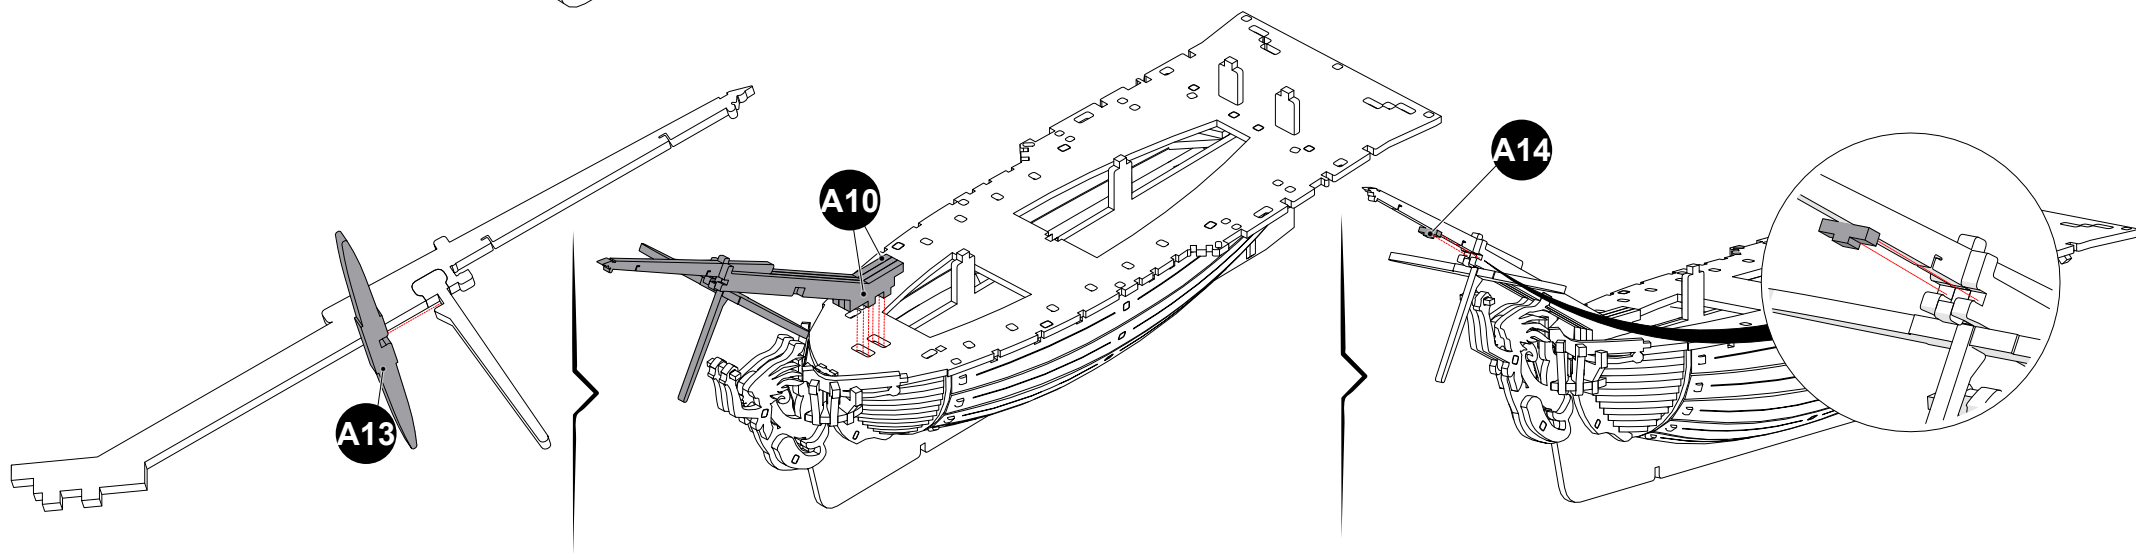

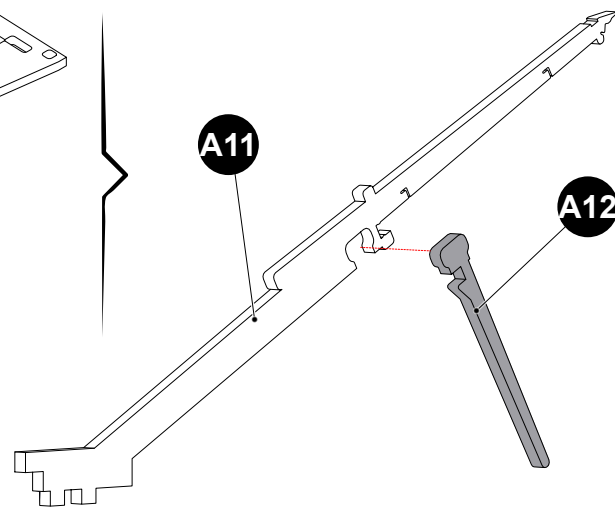

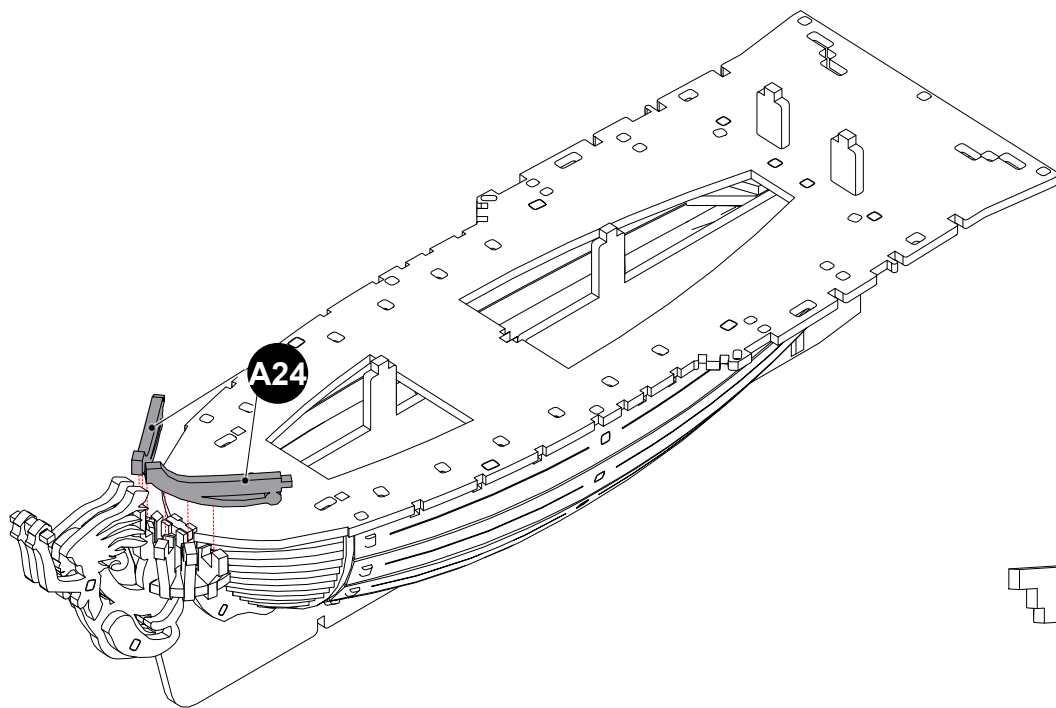

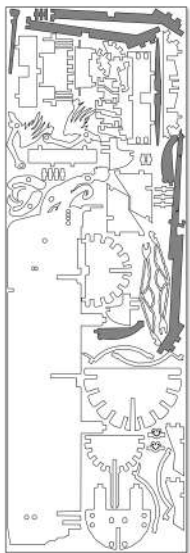

Хрупкая деталь — будьте осторожны при сборке
